Executive Summary

The bridge to financial freedom? Start with PEPU BANK. PEPU BANK was born to offer solidity, speed and creativity in the decentralized world. With a SuperBridge that eliminates waiting times and with exclusive services for those who hold \$PENK, we position ourselves as the real alternative to the limits of Pepe Unchained's Layer 2. Our vision? Building a meme-banking infrastructure that combines technology, community and fun.

PEPU BANK is a next-generation decentralized protocol built on the new Pepe Unchained Layer 2 network, powered by the utility token \$PENK. Our mission is to deliver seamless access to the PEPU ecosystem through powerful tools like the SuperBridge, Layer 2-native token purchases, and gamified community features.

We believe in building tech for the people, focused on ease of use, fairness, and community ownership.

The Problem

Bridges are too slow: It currently takes up to 7 days and 6 hours to transfer funds from Layer 2 to Layer 1.

Complicated purchase of \$PEPU on L2: There is no simple and direct system.

Unstable projects: Too many failures disguised as solidity. We are truly solid. Like a bank.

The Solution

PEPU BANK SuperBridge: Fast transactions between Layer 2 and Layer 1. No more endless waiting.

Easy purchase of \$PEPU on L2: Payments in ETH, BTC, USDC, directly from our site.

Use of \$PENK for exclusive services: priority access, reduced fees and future utilities.

A great classic reinvented: A multiplayer game with a PEPU theme to activate the community and give value to the token.

Technology

Blockchain: Ethereum + Layer 2 Pepe Unchained

Smart Contracts: For bridges, purchases, rewards and services

Upcoming technologies: DAO for governance and decentralized dApp

Team and Collaborations

Founder: @PEPU_BANK1

Co-Founder: @brodo_di_pollo

Admin/Investors: @CryptoConnoisseurOG, @blabla0020,
@covernrb

Artwork: @V_for_Venom

Development: Anonymous (to be revealed at Superbridge launch)

Ongoing collaborations with other L2 projects to create a PEPU-friendly network.

Tokenomics

Token: \$PENK

CA: 0x82144C93bd531E46F31033FE22D1055Af17A514c

Total Supply: 1 Billion \$PENK

Token Utility: Access to SuperBridge services, Reduced transaction and purchase fees, Participation in the Loyal Rewards system

100% Fair Launch on Pepe's Pump Pad

- No Presales
- No Airdrops
- No Early Team Allocations

Team Supply: 150 Million \$PENK (15%)

Allocated towards:

- Marketing
- Development
- Liquidity
- Bank Reserves

Roadmap

Phase 1: July 2025 🎉

- Official website launch + SuperBridge
- SuperBridge enables fast and secure bridging
- Exclusive access for \$PENK holders

Phase 2: August 2025 💰

- Direct \$PEPU purchases on Layer 2
- ETH, BTC, USDC payments accepted
- Discounted purchasing compared to market

Phase 3: December 2025 🔥

- PEPU-themed multiplayer game launch
- Grand Prize and Scoring System
- Community Engagement and New Utility

The SuperBridge Explained

The SuperBridge enables instant transfers of \$PEPU from Layer 2 to Layer 1, bypassing traditional delays.

How it works:

1. User initiates a bridge by sending \$PEPU to a Layer 2 smart contract.
2. Smart contract sends equal amount of \$PEPU instantly to address of user on Ethereum Layer 1.

Features:

- Instant delivery
- Access restricted to \$PENK holders
- User-friendly
- Bridge fee in \$PEPU (TBD)
- L1 pool is pre-funded and managed by PEPU BANK

Direct L2 Purchase of \$PEPU Explained

One of the key innovations of the PEPU BANK ecosystem is the ability for users to purchase \$PEPU directly on Layer 2, eliminating the need for costly and time-consuming bridging processes.

Traditionally, bridging assets from Layer 1 to Layer 2 involves multi-step transactions, high gas fees, and delays—especially when returning to Layer 1 due to native withdrawal periods (e.g., a 7-day wait). At PEPU BANK, we've chosen a different path: a smarter, faster, and more user-friendly solution.

How It Works:

Through our official platform, users will be able to purchase \$PEPU directly on Layer 2 using funds from Layer 1. Supported payment methods will include:

- ETH
- BTC
- USDC

This system is designed to streamline the onboarding process, providing two major benefits:

1. Zero Gas Fees for Users: All backend transaction costs will be handled by PEPU BANK, ensuring a gas-free experience for the buyer.
2. Discounted Token Pricing: \$PEPU will be offered at a price lower than the market rate, rewarding early adopters and maximizing token value.

This frictionless purchasing system removes unnecessary steps, increases access to \$PEPU, and makes the overall experience significantly more efficient and cost-effective.

At its core, this model is designed to empower the community—by giving them more control, more value, and more \$PEPU with every purchase.

Why Buy \$PEPU on Layer 2?

- Direct purchase with ETH, BTC, USDC
- Discounted pricing
- Zero gas fees
- No bridging or technical steps
- Integrated into PEPU Bank website

Disclaimer

\$PENK is a meme token created purely for community engagement and utility within the PEPU BANK ecosystem. It is not financial advice, an investment product, or a guarantee of profit.

- No Financial Advice: PEPU Bank does not offer financial, legal, or investment advice. Participation is entirely at your own risk.
- Utility Only: \$PENK is a utility token with no promise of returns, no ownership rights, and no governance power.
- Jurisdictional Compliance: Users are responsible for ensuring their legal eligibility based on local laws.
- Risk Warning: Crypto assets are volatile. Loss of funds is possible. Use all PEPU BANK tools and features at your own discretion.

Thank you for taking time to read our White Paper!

We welcome you to Bank with \$PENK
